

# Have you seen this?

**Water Vole**  
(*Arvicola Terrestris*)

The Water Vole is one of many species at risk in Northumberland. We are working to develop and deliver a range of action plans that will protect these vulnerable species and their habitats.

By telling us where and when you saw this mammal you will be helping us to compile a profile of the Water Vole across the county. This will enable us to enhance the region's biodiversity and safeguard the environment for the future.

Tell us by logging on to:
